

Hello! Let's set up your Texty.

You need your phone and your WiFi password. About 10 minutes.

1 Plug it in

USB-C cable into the back of the dock, other end into a USB charger.

2 Paper in, printer on

Roll in, loose end towards the slot, lid closed. Hold the printer's power button for 2 s.

3 Scan the WiFi code

Texty prints a setup slip. Scan its QR code with your phone camera and join.

4 Pick your home WiFi

On the page that opens (2.4 GHz WiFi). No page? Open 192.168.4.1

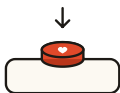

5 Make it yours

Scan the second QR code and type your name. Texty prints "Welcome".

6 Invite friends

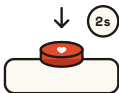

Add Texty to your home screen, turn on notifications, share an invite.

The heart button

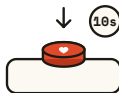

Tap

♥ to whoever sent the last note

Hold 2 s

prints a login code for you

Hold 10 s

reset, starts setup again

Stuck?

No slip? Close the printer's own phone app, switch the printer off and on, tap the heart.

Wrong WiFi? Use 2.4 GHz WiFi and check the password. Just try again.

Moved house? After 5 minutes Texty prints a new WiFi code.

Out of paper? New roll in, lid closed. Nothing is lost: waiting notes print by themselves.

Quiet at night? Set quiet hours in Settings, and notes wait until morning.
